## PARTNERING WITH PENANG GREEN HUB

In celebration of World Environment Day 2025, we terrapaq™ proudly participated in the Penang Green Hub, a community initiative organized by the Penang Green Council. This platform brings together businesses, organizations, and the public to promote sustainable living and raise environmental awareness. Our involvement reflects terrapaq™'s continued commitment to offering practical, eco-friendly alternatives and supporting efforts that help reduce plastic waste at the source.

## MAKING IMPACT WITH 1,000+ TERRABAGS

Before the Penang Green Hub event, we terrapaq™ supported an eco-focused hotel gathering by providing our biodegradable singlet bags. Over 1,000 guests used our self-destructing bags, making a real impact by choosing a greener alternative.

## BIODEGRADABLE OPTIONS: TERRASTRAW

terrapaq™ offers a full range of biodegradable products: straws, singlet bags, cutleries, and cups. Created to support sustainable lifestyles and reduce plastic use. Each item is thoughtfully designed to perform efficiently while minimizing environmental impact. By choosing these alternatives, our partners and customers are contributing to a cleaner planet.
